Improving Safety Performance for Concrete Pump Trucks Kick Off Meeting

INTRODUCTION

The Concrete Pumping Association of Australia's 'Improving Safety Performance for Concrete Pump Trucks' project has been awarded key funding through the National Heavy Vehicle Regulator's (NHVR) Heavy Vehicle Safety Initiative, supported by the Federal Government.

The project aims to deliver Safer Drivers, Safer Vehicles and Safer Road Use by addressing specific points that will ensure the project is aligned with stated road safety priorities of governments, the NHVR and is consistent with safe system principles.

These points aim to acquire more understanding and communication of risks associated with operating oversize concrete pumps on-road,

whilst developing appropriate performance standards and operating conditions for larger concrete pumps, improving driver awareness and behaviour to ensure concrete pumps are operated safely in all road conditions, understanding new technologies to improve road safety, reviewing existing Performance Based Standards (PBS) performance requirements and finally, conducting field safety to validate computer models and inform the development of better performance standards, guidelines for safe operation, appropriate operating conditions, and safety information to inform stakeholders about concrete pump road safety.

OUR SPEAKERS

Craig Heidrich

CONCRETE PUMPING
ASSOCIATION OF AUSTRALIA

Marcus Coleman

TIGER SPIDER

AGENDA

2:00 - 2:10	Welcome & Housekeeping	Virtual attendees signing into Workshop. Craig Heidrich, CEO, Concrete Pumping Association of Australia, to welcome all to the Kick Off meeting. Introduce the CPAA.
2:10 - 2:20	Introduction: Craig to open proceedings, introduce our speakers, objectives for HSVI Project	Introduce our speaker(s). Why CPAA & Tiger Spider are undertaking this project. Brief overview of Heavy Vehicle Safety Initiative.
2:20 - 2:40	Tiger Spider: Marcus Coleman	Marcus Coleman, Managing Director, Tiger Spider to provide overview of TS and expand on deliverables.
2:40 - 2:50	Overview of HVSI application & funding process	CH / MC to provide overview of project objectives and expand on proposed methodology.
2:50 - 3:10	Summary of Project Objectives	Craig Heidrich & Marcus Coleman to provide overview of project objectives and expand on proposed methodology.
11:00 - 11:10	Workshop discussion Q&A for next steps and close	Facilitated by Craig Heidrich, CEO, Concrete Pumping Association of Australia

- Concrete Pumping Association of Australia

The CPAA is the national body representing the interests of the concrete pumping industry in Australia. The CPAA seeks to provide a strong, unified and respected voice for the Concrete Pumping industry across Australia whilst working to improve the professionalism, safety, standards and performance of the industry it represents.

Our mission is to improve the standing of the industry by informing and educating our members through the provision of valuable advice as well as relevant products and services.

- Tiger Spider

Tiger Spider is a transport engineering consultancy that aims to minimise the potential for accidents and serious injuries for operators of large road vehicles. We also work towards continuous productivity improvements and environmental sustainability.

Tiger Spider provides our customers with opportunities to leverage better technology by removing technical, regulatory and economic obstacles. With deep industry knowledge and experience, we anticipate and meet the needs of an increasingly competitive marketplace.
